Two games and two game jams with Unity, 3D modeling with Blender

Information Technology Assistant
Vocational College for Design and Technology, Aachen
2018 – 2020
Programming, databases, web development, electrical engineering

PROFILE

I've been working with Unreal Engine since 2019, first on personal projects and later professionally, always with a focus on multiplayer games. I'm currently an Unreal Engine Generalist at Buried Beneath Interactive. On the side, I build my own Unreal Engine plugins and sell them on Fab.

EXPERIENCE

Unreal Engine Generalist — 06/2026 – present
Buried Beneath Interactive · Remote · NDA

- Architecture planning and development of gameplay systems
- Multiplayer development
- UI development with CommonUI and Figma
- Technical documentation and task planning in Jira
- Planning playtests and bug fixing

Freelance Unreal Engine Developer — 2022 – 05/2026
Self-employed · Remote

- Smaller client projects via Fiverr
- Own prototypes and game projects in Unreal Engine

Game Developer — 2019 – 2022
Unordinal AB, Stockholm · Remote, full-time · NDA

- Development of two multiplayer game demos in Unreal Engine (unreleased)
- Backend architecture on Amazon Web Services (AWS)
- Planning and running playtests on player experience and game balance
- Analysis of gameplay flows, documentation of findings and implementation of improvements with the team

PUBLISHED PLUGINS

Four C++ plugins for Unreal Engine 5 that I build and sell on Fab. All of them support multiplayer and come with their own editor tools.

GameFeel Forge
Hit feedback and game feel: 91 effects, timeline editor with live preview
C++ · Niagara · Editor tool

Effect Forge
Buffs, debuffs and elemental reactions without GAS
C++ · Replication · Data assets

Tally Achievement Forge
Achievements and stats for Steam and EOS
C++ · Online Subsystem · Editor tool

Smart Ping System
Ping and marker system for multiplayer
C++ · Replication · UMG
